

FS-ISAC provides timely, targeted information, tools and resources about cyberthreats, threat mitigation and related subjects to specific member groups that make up its full membership. The Credit Union Council (CUC) is one of these groups. If your institution is a credit union with under \$20 billion in assets, membership in the CUC is the best way for your organization to receive specific, actionable cybersecurity information.

Members are becoming increasingly aware of cybersecurity threats, and they expect their credit unions to secure and protect their private financial information. In addition to being a market driver, taking steps to ensure the confidentiality, integrity and appropriate availability of customer data is a regulatory requirement.

Why Should I Join?

Threat actors do not discriminate based on size or type of institution. To provide the cybersecurity that members expect, meet regulatory requirements and reduce your institution's risk, you need to be aware of the latest developments in the cybersecurity landscape. CUC membership gives you a central source of information about current threats, mitigation techniques and best practices, all within FS-ISAC's "circle of trust." Membership in the CUC also automatically enrolls you in its parent council, the FS-ISAC Community Institution and Association Council (CIAC), which also includes the Community Bank Council.

“
We are better equipped to brief the board thanks to the threat intelligence of many financial institutions. We see what occurs not just for other credit unions but larger community institutions and even national banks.

Member Benefits:

- Immediate alerts about new physical and cybersecurity incidents and threats.
- Guidance from and information sharing with other CUC and CIAC members.
- Monthly CIAC members-only virtual meetings, featuring guest speakers.
- Weekly risk reports and ongoing information about industry best practices and solutions.
- Educational programs to enhance your cybersecurity initiatives.
- Reporting methods, either open or anonymous, if your organization comes under attack.

The CUC is like a virtual “neighborhood watch” that can help you meet your data protection needs. When one FS-ISAC member institution detects suspicious activity on its network, it informs other members, often within minutes. Such forewarning could mean the difference between experiencing a data breach or other security incident and thwarting an attack.

How Do I Join?

To join the CUC or for more information email admin@fsisac.com or visit [fsisac.com](https://www.fsisac.com).
