

FS-ISAC provides timely, targeted information, tools and resources about cyber threats, threat mitigation, and related subjects to specific member groups that make up its full membership. The Credit Union Council (CUC) is one of these groups. Membership in the CUC is the best way for your organization to receive specific, actionable cybersecurity information.

Members are becoming increasingly aware of cybersecurity threats, and they expect their credit unions to secure and protect their private financial information. In addition to being a market driver, taking steps to ensure the confidentiality, integrity, and appropriate availability of customer data is a regulatory requirement.

Why Should I Join?

Threat actors do not discriminate based on size or type of institution. To provide the cybersecurity that members expect, meet regulatory requirements and reduce your institution's risk, you need to be aware of the latest developments in the cybersecurity landscape. CUC membership provides community without complexity - helping your community institution connect, protect and thrive through a central source of information about current threats, mitigation techniques and best practices, all within the FS-ISAC "circle of trust." Membership in the CUC also automatically enrolls you in its parent council, the FS-ISAC Community Institution and Association Council (CIAC), which also includes the Community Bank Council.

“
We are better equipped to brief the board thanks to the threat intelligence of many financial institutions. We see what occurs not just for other credit unions but larger community institutions and even national banks.”

Credit Union**

Member Benefits:

- Access to FS-ISAC's Intelligence Exchange platform including Share and Connect.
- Critical sector alerts about fraud, physical and cybersecurity vulnerabilities, incidents, and threats.
- Best practices from and information sharing with other CIAC members.
- Monthly CIAC members-only meeting and virtual Summits, featuring guest speakers.
- Community institution focused reports and information about industry best practices and solutions.
- Document library and training workshops to enhance your cybersecurity initiatives.
- Opportunities to join other FS-ISAC Communities of Interest

The CUC is like a virtual "neighborhood watch" that can help you meet your data protection needs. When one FS-ISAC member institution detects suspicious activity on its network, it informs other members, often within minutes. Such forewarning could mean the difference between experiencing a data breach or other security incident and thwarting an attack.

How Do I Join?

To join the CUC or for more information email admin@fsisac.com or visit fsisac.com.
