

An FS-ISAC member has requested member participation in a survey on Java Vulnerability Mitigation. Primary Points of Contact will be the only persons receiving the invitation. The FS-ISAC hopes that the one-invitation-per-institution approach will increase the quality of the data we receive, but we rely on POCs to take an active role in the survey process.

The purpose of this survey is to discover which methods are being used by financial institutions to mitigate Java vulnerabilities and gain insight into how they are enforced. We are using SurveyMonkey for this survey. The invitation will come from [fsisac@surveymonkey.com](mailto:fsisac@surveymonkey.com). The survey link is uniquely tied to this survey and your email address. Please do NOT forward the SurveyMonkey invitation. If you need to consult with your internal subject matter experts before completing this survey, the survey questions are available as FS-ISAC Survey on Java Vulnerability Mitigation.pdf (attached to Tracking ID 901276 on the FS-ISAC Portal). Please do not return the .docx form to the ISAC. The form is intended to help you obtain feedback so you can better complete the survey yourself.

The survey is being sent to FS-ISAC Basic, Core, Standard, Premier, Gold and Platinum member institution Points of Contact. The invitation will be sent out Monday, January 28, 2013. The survey will be open from Monday, January 28, 2013 to midnight ET, Friday, February 1, 2013. Your input will be anonymous.

Thank you for your participation,  
FS-ISAC Customer Service
