

Greetings,

A couple of things we wanted to make sure you knew about. First, we will be holding an industry exercise at the 2013 FS-ISAC and BITS Annual Summit on Monday, April 29th, 2013 at the Sawgrass Marriott in Ponte Vedra Beach, FL. The member-only two-hour interactive exercise will take place from 3:30pm-5:30pm and will look at realistic threats facing the financial services sector. All participants will receive the resulting report. We are pleased to conduct the exercise in partnership with Booz Allen Hamilton, which has supported the Cyber Storm Series Exercises (Cyber Storm I-III) for DHS.

A working group within the Business Resiliency Committee (BRC) has updated the All-Hazards Crisis Response Playbook, which was developed by the FSSCC and the FS-ISAC. The playbook describes the sector's organizational roles and functions and outlines actions that member firms may take to prepare for, respond to and recover from cyber and physical incidents. It documents the sector's core capabilities and constitutes a coordinated cyber and physical response process, predicated on a simple, consistent and structured framework, fully integrated with sector-specific and national level frameworks. The updated version of the playbook should be distributed to the membership in March. Please be sure to look out for it. The BRC meets monthly, if you are interested in joining the committee contact admin@fsisac.us.
