

An FS-ISAC member has requested member participation in a survey on controls around embedded images in HTML formatted emails. Primary Points of Contact will be the only persons receiving the invitation. We ask that they complete the survey, or forward the invitation to the appropriate person at their institution to complete. The FS-ISAC hopes that the one-invitation-per-institution approach will increase the quality of the data we receive, but we rely on POCs to take an active role in the survey process.

The purpose of this survey is to identify a set of practices employed by other Financial Institutions to control downloading and rendering of images in HTML formatted emails. We are using SurveyMonkey for this survey. The invitation will come from fsisac@surveymonkey.com. The survey link is uniquely tied to this survey and your email address. Please do NOT forward the SurveyMonkey invitation. If you need to consult with your internal subject matter experts before completing this survey, the survey questions are available as FS-ISAC Survey on Controls Around Embedded Images in HTML Formatted Emails.pdf (attached to Tracking ID 896847 on the FS-ISAC Portal). Please do not return the .docx form to the ISAC. The form is intended to help you obtain feedback so you can better complete the survey yourself.

The survey is being sent to FS-ISAC Basic, Core, Standard, Premier, Gold and Platinum member institution Points of Contact. The invitation will be sent out Monday, January 21st, 2013. The survey will be open from Monday, January 21st, 2013 to midnight ET, Friday, January 25th, 2013. Your input will be anonymous.

Thank you for your participation,
FS-ISAC Customer Service
